**A Full Stack Web Developer with proficiency in database management systems (NoSQL and SQL), sound knowledge on concepts of basic computer sciences.**

## EDUCATION

St Paul's School, Udaipur	10 <sup>th</sup> grade	2017	Percentage (CBSE):92
MDS Public School, Udaipur	12 <sup>th</sup> grade	2020	Percentage (CBSE):92.4
Manipal University, Jaipur	BTech, Information Technology	2024	CGPA:8.61
Skills: Data Structures, Computer Networks, Operating Systems, Programming in Java, Object Oriented Programming			

## CERTIFICATIONS

Programming in C++	NPTEL (IIT-KGP)
Complete 2021 Web Development Bootcamp	Dr. Angela Yu (Udemy)
The Complete NodeJS Developer Course	Andrew Mead (Udemy)
React-The Complete Guide	Maximillian Schwarzmuller(Udemy)
Academy DFO Course	Oracle

## PROJECTS

### **NodeJS Weather App [<https://milindb-weather-app.herokuapp.com/>]**

- Used open-source API to implement a weather app that takes text as input and gives the general information of the weather in that area.

### **PHP Library Management System**

- Uses SQL as Data Base.
- A simple Library Management System that keeps track of currently available books, book loans, publishers' information as well as all the associated library branches
- Uses stored procedures in MySQL to do some complex tasks.

### **NodeJS Task Manager**

- Stores Users Task.
- Login and Signup System. Uses MongoDB as database.
- Implemented complicated User Authentication and Task to User relationship in MongoDB.
- Uses password hashing.

### **NodeJS Chat App**

- Uses Socket.io.
- Users can create new rooms or enter an already created room.

### **Command Line Notes App**

- Uses yargs (NPM package) to define command line arguments.
- Stores data in a JSON file.

\*All the above projects are uploaded on GitHub

## TECHNICAL SKILLS

**Technical Skills:** JavaScript, C/C++, PHP, NodeJS, React, Java  
**Software Development Tools:** VS Code, NetBeans, GitHub

**Operating Systems:** Linux, Windows  
**Databases:** Oracle, MySQL, MongoDB
